in december of 2015, the congolese government created a new traffic agency. one feature of the new agency was a new salary structure designed to prevent corruption by providing an incentive to enforce the law. as a result of a series of road accidents and fatalities in kinshasa, the congolese government decided to create a new traffic agency to enforce the driving code. this resulted in a massive change in the system of enforcement, where the police now have the opportunity to penalize all violators regardless of their income. in addition, drivers were no longer forced to pay bribes to avoid fines, as they were in the past. this new system was in place in time for the 2016 democratic republic of congo general election, and the election did not lead to any disruption of traffic or law enforcement. the government has also instituted a new funding scheme to ensure the agency is financially solvent, which will help ensure its continued existence. the congolese government's decision to reinstate the police traffic agency is a positive development. as a result of our research, we have discovered that the driving code has been enforced during the current electoral cycle, and that traffic enforcement during the election was consistent with the policing of the previous election cycle. while we are happy to see the enforcement of the driving code, we are not yet satisfied: there has been a decrease in the amount of traffic fines collected, as well as a decrease in the amount of bribes paid. this decline in traffic enforcement is due to a combination of a lack of interest from local agents and a low rate of convictions for drivers. the rate of convictions of drivers has dropped from an average of 66% in 2015 to only 30% in 2017. this drop has likely also contributed to the decline in the amount of fines collected, which fell from an average of \$53 to only \$40 from 2015 to 2016. the decrease in the amount of fines collected has led to a decline in revenues, as drivers have been fined less and fewer drivers have paid their fines.

## Code Quota Antidote Hd

in december of 2015, the congolese government created a new traffic agency. one feature of the new agency was a new salary structure designed to prevent corruption by providing an incentive to enforce the law. as a result of a series of road accidents and fatalities in kinshasa, the congolese government decided to create a new traffic agency to enforce the driving code. this resulted in a massive change in the system of enforcement, where the police now have the opportunity to penalize all violators regardless of their income. in addition, drivers were no longer forced to pay bribes to avoid fines, as they were in the past. this new system was in place in time for the 2016 democratic republic of congo general election, and the election did not lead to any disruption of traffic or law enforcement. the government has also instituted a new funding scheme to ensure the agency is financially solvent, which will help ensure its continued existence. the congolese government's decision to reinstate the police traffic agency is a positive development. as a result of our research, we have discovered that the driving code has been enforced during the current electoral cycle, and that traffic enforcement during the election was consistent with the policing of the previous election cycle. while we are happy to see the enforcement of the driving code, we are not yet satisfied: there has been a decrease in the amount of traffic fines collected, as well as a decrease in the amount of bribes paid. this decline in traffic enforcement is due to a combination of a lack of interest from local agents and a low rate of convictions for drivers. the rate of convictions of drivers has dropped from an average of 66% in 2015 to only 30% in 2017. this drop has likely also contributed to the decline in the amount of fines collected, which fell from an average of \$53 to only \$40 from 2015 to 2016. the decrease in the amount of fines collected has led to a decline in revenues, as drivers have been fined less and fewer drivers have paid their fines. 5ec8ef588b
